## Installing Support Boards

- 1) Turn your machine upside down on the towel as pictured below
- 2) Support your machine by leaning it against a table or have someone hold it
- 3) Place the boards as pictured below, 3 inches from each end and centered front to back
- 4) Use clamps if you have them or have someone hold the boards in place
- 5) Screw the boards to your machine bottom, so the screw head fits into the wood

## Installing Ball Bucket Support Board

- 1) Place board so it is centered between machine support boards
- 2) Use clamps if you have them or hold the board in place
- 3) Screw the board so the screw head fits into the wood
- 4) Place your ball bucket on the board below won ball outlet and lost ball outlet
